

Peer Review 2

1. My peers understood that the site's purpose was to allow all users to browse food recipes based on ingredients and interest and that it solves the problem of deciding what to cook and finding recipes easily.
2. They understood that the site was intended for people who like to cook or need help.
3. My peers felt the site was simple and well organized. They also liked the color scene.
4. They found the navigation and layout effective, but it could have more effort put in it.
5. My peers liked that it was structured and well commented. They also suggested adding more functionality to improve interactivity.
6. There found no issues with responsiveness and layout.
7. My peers suggested improving text by adjusting font type to improve readability.
8. The visitors overall rated the appearance and usability as positive.
9. The strongest part that was identified by my peers was its simplicity. I think that stood out because that made it to understand the purpose immediately.
10. They recommend to improve the text color and size and to add more functionality.
11. I will improve the font size and color to improve readability. I will also add more features to the site.
